

School can be fun!

The technology extracurricular activity:

In the technology extracurricular activity, you can build a lot of things using wood, cardboard, metal or other materials. The teachers are there to help you if you need help for anything.

The school band:

In the school band, we play covers of popular songs. It's very cool and you learn a lot of things about instruments and your voice. You also get the chance to play on school events.

The teachers and their classrooms:

The teachers in our school are very friendly and helpful.

Most of them decorate their classrooms, so if you go to another room, it is like to join in another world.

The look of our school and the school yard:

Our school is very beautiful and colourful. We have a lot of windows so it's always bright and comfortable. Our school yard is huge and in the breaks, you can go out and enjoy some fresh air.
